

Parallelamente all'aggiornamento tecnologico, produttivo e di design, Cosma ha continuato negli anni a ricercare e sperimentare nel campo delle finiture superficiali. I materiali lavorati, acciaio inox, alluminio e zama possono essere finiti con diversi processi: galvanica, verniciatura ed anodizzazione.

As well as ensuring it is up-to-date in technological, production and design terms, Cosma has, over the years, continued to conduct research and experimentation into surface finishes. The materials used, including stainless steel, aluminium and zincal, can be finished using a variety of processes, including electroplating, painting and anodization.
